EU MACROREGIONAL STRATEGIES CONFERENCE ON MEDIA AND COMMUNICATION

KNOW THY NEIGHBOUR

20 - 22 September, 2017

Portorož, Slovenia

The **EU MACROREGIONAL STRATEGIES CONFERENCE ON MEDIA AND COMMUNICATION – KNOW THY NEIGHBOUR** is aimed at bringing together media people, practitioners, academia, general public and interested stakeholders from the four EU macroregional strategies (Baltic, Danube, Adriatic-Ionian and Alpine) to discuss how to improve the visibility of macro-regional strategies in the public sphere and how to strengthen the media support to macro-regional endeavours.

Globalisation has made countries more interdependent, and problems must now be addressed across borders. This calls for a reflection on how macro-regions, as new functional areas, can contribute to improving the implementation of EU policies.

The emergence of macro-regional strategies (MRS) has been driven by a number of EU countries and regions as a complement to traditional national policies on territorial management. The aim of a macro-regional strategy is to mobilise new projects and initiatives thereby creating a sense of common responsibility. They provide regional building blocks for pursuing EU-wide policy, marshalling national approaches into a more coherent implementation at the EU level.

But without proactive communication, no effort is really seen from the outside, by EU citizens and stakeholders. During the *Mediterranean Coast and EU Macro-Regional Strategies Week* organised under the Slovenian presidency of the EU Strategy for the Alpine Region (EUSALP) in September 2016, a proposal to create a single horizontal pillar for all 4 EU macro-regional strategies was presented – **"the media/communication" pillar** – that would be of help in creating sufficient visibility for macro-regional strategies' joint endeavours and understanding, and support for the exchange of ways of thinking and acting within the MRS.

In its conclusions on the implementation of the EU macro-regional strategies (April 2017), the General Affairs Council noted that all four strategies could be further developed, notably also regarding communication, and invited the Commission to continue supporting the implementation.

In this common challenge, the media play a crucial role. As the macro-regional strategies address a functional area that is bigger than regional and national areas, and smaller than the EU, the visibility and recognition of macro-regional effects crucially depend on access to all media communication channels in the region. The event will address the following questions: What kinds of media address the macro-regional level? Are the media interested in common actions by neighbours or only in open issues and disputes? How are macro-regional efforts affected by the role of the media, media owners and trends, editorial policies, employment policies, in particular for young journalists, use (and abuse) of social media, participants in the media landscape, multimedia and the use of modern technologies?

How can macro-regional issues become more understandable and interesting to the media? How can specific target groups be reached at the local, national and macro-regional levels?

Can macro-regional strategies contribute to improving the media landscape, which would in turn strengthen their visibility and recognition by the general public?
