

AlpGov Final Event

28 November 2019

Auditorium Testori, Milan

Questions from “Pitch your project finalists” to AG Leaders

“MyCabin” Group

To AG5

We think that digital tools can offer a great benefit to tourist destinations. Do you have a program for digitalization in the tourism sector or do you focus on governance (which can be the same)?

To AG6

Which practical projects support these goals in times of uncountable new hotels, lifts and luxurious campsites? There are awesome options to support soft tourism.

“Edelweiss” Group

To AG2

Do you think it is possible to help local shops and businesses in the Alps to resist the competition of big supermarkets and multinational chains? And, if it's possible, would it be worth the effort?

To AG1

As one of your main focuses has been the creation of an extended and high-quality network between laboratories and research centers, do you have (future) projects related to students and young researchers' mobility within the Alpine network?

“Don't Drain Out Our Alps” Group

To AG 8

Are there other solutions besides terraced systems to solve the problem of hydrogeological risk?

To AG 7

What can be effective green infrastructure for mountain countries?

To AG9

Does domestic hydropower make sense with the use of micro-turbines?

“Eichi & Aussi” Group

To AG3

Does EUSALPS think of creating special educational programmes for young people during or after their school career?

We would appreciate any kind of „EUSALPs specialist seal of approval“ for employees who work in EUSALPs countries or attend courses there.

To AG4

Traffic and transport are two of the main challenges in the Alpine Valleys. Especially in the Tyrol, we have to live with thousands of commercial trucks and many traveling tourists. What do you think about the future of individual and public transport in the Alpine regions?
